

ADDENDUM 6 TO BID DOCUMENTS FOR THE

**LOST LAKE MARSH CREATION AND HYDROLOGIC RESTORATION PROJECT
(TE-72)**

TERREBONNE PARISH, LOUISIANA

LOUISIANA COASTAL PROTECTION AND RESTORATION AUTHORITY

October 7, 2016

ADDENDUM 6 TO BID DOCUMENTS

LOST LAKE MARSH CREATION AND HYDROLOGIC RESTORATION PROJECT (TE-72)

This addendum shall be considered part of the Plans, Specifications, and Contract Documents (except as noted otherwise) and is issued to change, amplify, or delete from or otherwise explain these documents where provisions of this addendum differ from those of the original documents. This addendum shall have precedence over the original documents and shall govern.

Bidders shall acknowledge receipt of this addendum on the Louisiana Uniform Public Work Bid Form.

I. CPRA Responses to Bidder Questions

1. **Question:** Does the triple waler system at elev. -2.5 only to be installed within the limits of the weir openings or is it to be installed throughout the entire length of the structure?

Response: The triple waler system at elev. -2.5 is to be installed only within the limits of the weir openings. The double waler system at elev. +1.5 is to be installed outside the limits of the openings.

2. **Question:** Can you provide more detail on the “Cap to Seal Sheet Piling Between Bay Frames” as shown on sheet 23 “Top View”

Response: No other detail is available at this time. Since the sheet pile is terminated below the water line, it is the intent that the Contractor provide 20” long flashing/cap to seal the opening at the top of the sheeting between bays. Shop drawings shall be submitted to the Engineer for approval prior to fabrication.

3. **Question:** Can you provide more detail on the “Flashing to seal sheet piling to Steel Frame” as shown on sheet 23 “Top View”

Response: No other detail is available at this time. It is the intent that the Contractor provide flashing to seal the opening between the outside most steel weir bay openings and the adjacent sheet pile. Shop drawings shall be submitted to the Engineer for approval prior to fabrication.

4. **Question:** Can you provide a vendor for bid item #7, Instrumented Settlement Plates?

Response: As per Technical Specification 251.4.1-10, Geokon, Inc. supplies this type of instrumentation.

5. **Question:** Will the owner consider adjusting the hydraulic dredging bid quantity to the proper amount expected to be cut from the borrow areas?

Response: Depending upon factors such as bathymetric changes, dredge size/operation, available funding, etc., the quantities for Bid Item 12, “Hydraulic Dredging and Marsh Creation” may be adjusted accordingly to achieve the construction marsh fill elevation in each marsh creation area. As per Note 1 under the Summary of Estimated Quantities on Sheet 2 of the Plans, the Owner reserves the right to adjust the Bid quantity +/- 25% without an adjustment of the unit price.
